The live 21 gameplay is a combination of traditional online RNG blackjack (Random Number Generated blackjack – computer) and land-based 21. The table layout is largely similar to that of any computer-generated online blackjack game: there are multiple betting spots, and you can select your chip values to set the size of your wager. And depending on what gameplay view you prefer, the live streaming video of dealer, table and cards (and any background happenings) will either show in the upper middle section of your screen, or fill your entire screen. The computer-generated interface allows us to place our wagers, while we get to watch the croupiers deal and chat with us and any other players. Level Two prizes are even better. In total, there are nine different bonuses for players to claim on Level Two, each bigger and better than those of Level One.
