If you wish to try this strategy first of all we advice you to get ready. You need to take pen/pencil and paper sheet. Let's start gambling and don't forget to write down everything what is going on. We begin with taking several figures, for example just four. Ok, let's assume that we took 4, 1, 2 and 3. Now it is time to place your bet. According to Labouchere strategy your first bet should be the sum of first and last figure. In our case it will be  $4+3=7$ . Then we place our first bet which will be 7 coins. Playing with Labouchere strategy you should prefer even money bets (with ~50% chances). Such bets are red/black, odds/even and others. Ok, if we have won we should cross our figures we used (4 and 3). Now we have two last figures on our paper (1 and 2). This means that our next bet will be the sum of the figure  $1+2=3$ . Thus we place 3 coins even money bet. If we were lucky again and won we should cross out two figures. Now our sheet is empty and we can create new list of figures for future bets.
