So what are the reasons for playing high roller slot machines? First of all, these slots have the higher payout. That's obvious — when you make a higher bet, you win more money, the luck permits. The high limit slots odds are usually higher than those of regular slot machines as the casino owners are trying to make the best use of small bet slots that are played more frequently and that's why increase the house edge for them. As slots with high limit are played not so often but are very lucrative for the casino, their RTP is higher and the high limit slot wins can happen relatively more often. Another reason for playing high limit slots is that they can bring you the most of the excitement and real gambling spirit. Playing a penny-slot is easy and after a certain period of time just stops being exciting. When you are playing on the 500 dollar slot machine, each spin strikes a chord in your soul, the time stops and there are only two of you — the gambler and the high limit slot. The problem is, one of you will lose the game but who cares when the reels are spinning? A very good poker player I know often talks about how lucky he is at the table. He gives examples of hand after hand when he got a lucky river card or something like that. And every time he gets a good flop he keeps talking about it afterwards. This is part of his strategy and it works. Would you play pocket jacks in a big pot against a player known for his luck? Subconsciously you would probably avoid it. The magical Hocus Pocus Deluxe casino game comes with 5 reels, 3 rows, and 40 pay lines. If you are keen on Merkur slot casino games, play this one to find yourself in the world full of magic! The Lucky Seven Strategy is effective and simple betting system which can be used in roulette. The main advantage of this system is relatively small bankroll which is needed to play. According to the Lucky 7 strategy you need to have enough money to place 24 bets. Thus if we bet \$1 on every spin we need to bring \$24 to a casino. Another rule of this strategy is that you should make even money bets (red/black, even/odds). Such approach guarantees that you will double your winnings each time you have positive outcome. This video slot has several features which can help you to get really big winnings. Let's see what you can do. If you wish to trigger free spins you have to match at least three Scatter symbols. And like in many online slots you will also meet the Wild symbol here. Its function is to substitute for the game symbols. Only the Scatter can't be substituted. You can't immediately withdraw your winnings as they are subject to playthrough requirements, which means that you must wager the total of the bonus amount or the deposit plus bonus amounts a certain number of times to be able to make a withdrawal.
