Live dealer casino games are a great way to add a human element to online casino gambling. They work by having a real human dealer operate a table, with real casino equipment. A video of the dealer is then live streamed to players. Players can wager on the game, just as they would when playing an online version, and can even chat with the dealer. These games are great for players who don't fully trust the random number generators used in online casino games. For those who do not know, each of the possible outcomes have odds associated with them. The odds reflect the likelihood of each event occurring and they reflect the total payout you will receive on your wager if your bet wins. As we said, normal slots have a fixed jackpot. This will be a set number of coins, could be 1000 or 30 000. Players decide how much they want each coin to be worth when placing their wager and this determines how much they win. With a progressive pokie, every time a player spins the reels, a portion of their bet is transferred to the jackpot. With thousands of players contributing, this grows quickly and keeps growing until someone wins. Video slots promotions

No gambling laws were issued at that time so gambling wasn't legally approved yet but it wasn't prohibited either and the first casinos started to appear all over the country. The activity of the casinos of that times was completely unregulated: they were not paying any taxes to the government and even the legal gambling age was not determined. Obviously, the safety of some casinos was quite doubtful and they could do more harm than the modern online casinos accepting Lithuania players. \$1000 slot machine
