Wheel of Fortune feature can be randomly activated in the main game. The random reel is highlighted and the Wheel spins selecting one random icon, which will replace all icons on the selected reel. In the free spins mode, this feature is initiated on every spin selecting up to 5 reels. There only 2 icons on the wheel – blank and Joker. If the Joker is selected, it replaces all icons on the highlighted reels. So what are the reasons for playing high roller slot machines? First of all, these slots have the higher payout. That's obvious — when you make a higher bet, you win more money, the luck permits. The high limit slots odds are usually higher than those of regular slot machines as the casino owners are trying to make the best use of small bet slots that are played more frequently and that's why increase the house edge for them. As slots with high limit are played not so often but are very lucrative for the casino, their RTP is higher and the high limit slot wins can happen relatively more often. Another reason for playing high limit slots is that they can bring you the most of the excitement and real gambling spirit. Playing a penny-slot is easy and after a certain period of time just stops being exciting. When you are playing on the 500 dollar slot machine, each spin strikes a chord in your soul, the time stops and there are only two of you — the gambler and the high limit slot. The problem is, one of you will lose the game but who cares when the reels are spinning?
