The war between Apple and Android, based around which is more successful and which is the better product, has been prevalent for some time now – Apple users will argue the Apple is better, while Android owners will no doubt argue the opposite. What is evident is that this mobile OS contest is a two-horse race, and both have done brilliant things with their products. This can have a significant effect on odds and probabilities for particular scenarios, especially when less than three decks are in play. For example: when playing with six standard decks (312 cards in total), the house edge on a tie bet is 18.65 per cent; but using just a single deck of 52 cards, the edge on the same wager almost doubles to 35.29 per cent. Other symbols include a volcano that roars to life and spews lava when it forms a winning combo and a cool vine-covered dinosaur-era plant. To fill out the rest of the symbols, the designer uses their traditional set of high card images: nine through Ace. Each of these is stylized to fit the dino theme. Missing from Lion's Pride are progressive jackpots (so common on modern poker machines) and bonus rounds that involve the game's theme, a second screen, or any skill-based play. The Gamble Game is entirely based on luck and since it has nothing to do with the safari theme (why is the player picking a card in the middle of the Serengeti?) it's not really a bonus game at all, and is no different from other pokies by Microgaming that offer the identical extra multiplier chance. Poker machines fans looking for complex plots, progressive prizes, or larger payouts for less frequent wins may not enjoy Lion's Pride – the same goes for penny pokie players and high rollers that don't consider \$10 per spin a large bet.
